INDUSTRY LEADERS FORM NEW PARTNERSHIP

Easter's Lock & Security Solutions is proud to announce that they have been named the Factory Authorized Dealer for Horton Automatics sales, service, and product installation for the Mid-Atlantic Region. Easter's Lock & Security Solutions is a 65+ year-old company and the largest independently owned provider of physical and electronic security in Maryland.

"We are excited to be partnering with Horton Automatics," stated Bob Easter, President of Easter's Lock & Security. "Being able to offer our customers more products from a leader and innovator in the automatic door industry is a major step to expand our service offerings to commercial customers."

About Easter's Lock & Security Solutions

Considered to be a one source provider for all your security needs including doors, door hardware, locks, and high security facility solutions. Easter's provides security and door solutions for any industry including commercial, residential, and government facilities. With the largest fleet of full service security technicians in the region, Easter's is able to provide quick, reliable service with highly trained professional technicians and installers.

About Horton Automatics, Inc.

Horton Automatics Inc. was formed in 1960, placing the first commercial automatic sliding door on the market and literally establishing a brand-new industry. Since then, they have been designing, manufacturing and selling automatic doors in America and is recognized as an industry leader with product innovation, superior craftsmanship and outstanding customer support. Horton Automatics is a division of the Overhead Door Corporation.

THE NEW LOCKMASTER'S LKM10K PEDESTRIAN DOOR LOCK

The LKM10K is the next generation of the 15-year field tested LKM7000 Series Locks currently in use and is approved to meet Federal Spec FF-L-2890B. With over 25,000 LKM7000 locks in the field today, we are confident the improvements made to the next generation of this lock series will exceed your expectations. Our favorite feature of the new LKM10K Series is the addition of a Panic Bar Exit Device for out-swinging doors.

LKM7000 Series End-of-Life Notice

As part of Lockmaster's introduction of the new LKM10K Lock Series, an end-of-life notice has been issued to suppliers for the LKM7000 Series locks. Manufacturing of the LKM7000 Series ceased December, 2017. Replacement parts will continue to be made available to all customers and Easter's Lock & Security Solutions will continue to service these locks through the duration of their life-cycle.

LKM10K Lock Procurement

Easter's Lock & Security Solutions is an Authorized Reseller and Stocking Distributor for the LKM10K Lock Series. The LKM10K can found on our GSA Schedule #GS-07F-161AA. For GSA purchasing please visit GSA Advantage or contact Samantha at samantha@easterslock.com

LKM10K Lock Installation

Did you know our GSA Certified Technicians have completed all training for the new LKM10K Lock Series? We are certified to install and service it at your civilian agency/facility/base.

NEW FEDERAL STANDARD 809 PROHIBITS THE NEUTRALIZATION AND REPAIR OF ALL BLACK LABEL GSA CONTAINERS

Do you have a Black Label container that is currently affixed with a Kaba Mas X-09 spin dial? If so, it might be time to consider upgrading that lock to a new Kaba Mas X-10. On April 4th, GSA released a new Standard 809 stating that once a Black Label GSA Container is neutralized (drilled open) it cannot be repaired. **Easter's Lock & Security Solutions** highly recommends that all customers who are currently utilizing the X-09 spin dial upgrade their lock to the newest Kaba Mas X-10. In October 2015, the X-09 was issued its end-of-life because of a prevalent issue regarding the stepper motor. The X-09 showed signs of continuous failure and as such was replaced with the X-10. To date, the X-10 has performed exceptionally well. Even if your X-09 is working fine, should you experience a failure we cannot drill open your lock and repair it. **Upgrading to the Kaba Mas X-10 now can save you the cost of a new GSA Container.**

➔ FED STANDARD 809 RECOMMENDS PERIODIC SERVICE OF GSA CONTAINERS

Per the new Standard, Periodic maintenance of electro-mechanical combinations is highly recommended for all locks and should include the following:

- Operate the lock to include changing the combination as appropriate under local and national policy requirements.
- Check the dial and dial ring for proper alignment and smooth operation.
- Check for loose dial ring, spindle or mount screws.
- Replace all damaged parts. Lubricate according to manufacturer's instructions using only the recommended lubricant.
- Check LCD for missing segments, cracks in the display lens or error codes displayed.
- Perform the battery check procedure, replace batteries if appropriate. Replace batteries every 5 years or as recommended by the manufacturer.
